Kabsy School of Domestic Workers classes are well equipped with modern day technology that equips learners with necessary skills and the learning environment is conducive with spacious classrooms and quite environment.

Main campus- Kabsy School of Domestic Workers.

Admissions Policy

Kabsy School of Domestic Workers aims is to empower vulnerable youths, women and men have access to formal training that increases employment and entrepreneur opportunities leading to self sustenance.

Applications are open every month.

Entry Requirements

- ❖ Applicant must be able to read and write
- ❖ Domestic Training Non Refundable application form
- ❖ Holder of National Registration Card (NRC) or Passport
- ❖ Physically fit

A. DOMESTIC TRAINING PROGRAM

Is a Two weeks Theory and Two weeks practical training program in which students are exposed to homes, offices, shops and home gardens to blend theory into practical day to life activities.

The program has 9 courses which are designed to equip learners to do any domestic work training such as baby sitting, housekeeping, washing and laundry, cooking and gardening.

Courses

KSDW001: Eloquent & Communications Skills

KSDW002: House Keeping and Home Management

KSDW003: Personal Hygiene

KSDW004: Understanding the Gospel of Jesus Christ

KSDW005: Image Building

KSDW006: Cooking & Basic catering

KSDW007: Washing & Laundry

KSDW008: Fraire Care

KSDW008: Gardening and Land scaping

KSDW009: Practical Field Work

FEES: K 1,000 (ZMK).

B. DRIVING & MECHANICS

Description: Driving & Mechanics is a 4 week Training program for drivers who want to have basic mechanics skills.

This course is designed for those who are interested in looking after their 4WD, AWD and 2WD vehicle but have no prior knowledge of basic mechanics. If you ever wanted to know how to service your own vehicle or be able to make emergency repairs in remote situations, then this course is for you.

This course will give you an understanding of the mechanical principles employed in modern vehicles and allow you to practice basic servicing techniques and minor repairs so you are better equipped to maintain your vehicle in sound condition, find faults easily and effect emergency repairs.

Fees: K 1500

Approximately 1 – 2 hours of theory spread out throughout the day (depending on the questions and input from course participants) – the rest of the day is practical “hands on”. Prepare to get your hands dirty, or your gloves.

Do I need any special equipment?

We will have the necessary tools and all vehicle components for you to pull apart and put back together. Bring with you the vehicle manufacturer manual, gloves, rags, and your tools (if you have a set) or you are able to use our equipment.

What can I learn?

KSDW 10: Driving skills

KSDW 11: Traffic rules

KSDW 12: Mechanical principles of the engine (2WD, AWD and 4WD)

KSDW13: Major vehicle components (disk/drum brakes, clutch, gear box/transmission, coolant system, electrical/fuel systems and suspension systems, and more).

Hands on, practical mechanical maintenance, such as:

- Understanding the functions of the major vehicle components, inspecting and minor repairs (Chassis, Drive-Line, Engine, Steering, Brakes, Electrical, Suspension, Axles and Wheels).
- Understand the functions of the 5 supporting systems (Fuel, Ignition, Electrical, Cooling, Lubrication),
- Replacing and maintain disk/drum pads, shock absorbers, wheel bearings, wheel hubs,
- Flashing coolant system and bleeding brake systems,
- Checking and replacing oils (engine, gear box/transmission, brake/clutch master cylinders differentials and transfer case)
- Checking, recharging and replacing a vehicle battery, including replacing light bulbs and fuses,
- Checking and replacing hoses and fan belts
- Fault Finding (How to get an engine going again);
- Repairs in the bush (What to do when you are miles from nowhere) and using available equipment.

C. RESIDENTIAL WIRING AND ELECTRICAL TRAINING

Students learn how to install, maintain, and repair electrical wiring, equipment and fixtures. To be employed as an electrician, training involving both hands-on experience and learning from experienced workers is a must.

This certificate program prepares individuals with the knowledge and skills needed for employment in the residential electrical trade. The curriculum offers a basic framework of electrical theory and provides the hands-on skills needed to install service and maintain electrical equipment in residential settings.

Courses

KSDW 14: Electrical safety

KSDW 15: Trade tools

KSDW 16: Electrical theory

KSDW 17: Common residential wiring installations

KSDW 18: Troubleshooting and repairing residential service

KSDW 19: Determining circuit load calculations and compliance.

Students will have the opportunity to complete the Safety training and prepare for a Certification exam.

Skills and Competencies

- ❖ Electrical safety
- ❖ Blueprint reading
- ❖ Fundamentals of electricity
- ❖ Residential electrical systems
- ❖ Basic electrical circuits
- ❖ Electrical measurement and testing equipment
- ❖ Series and parallel circuits
- ❖ Cables and terminations
- ❖ Switches and receptacles

Course Length: 1 Month

Open Enrollment

Fees: 1,000 (ZMK)

D. AIR CONDITIONING & REFRIGERATION

Program Overview: There is steady demand for refrigeration and HVAC (Heating, Ventilation, Air Conditioning) specialists—in commercial, industrial and institutional settings. It is an apprenticeship trade, so you'll find a clear path to a journeyperson's ticket and excellent earning potential.

The job itself has a mechanical focus. You install, maintain and repair refrigeration and cooling systems. But it also involves problem-solving skills, basic math skills, the ability to read and interpret specifications, and the ability to work with power tools and sophisticated technology.

The Three Months Refrigeration and Air Conditioning certificate program is offered in Zambia. Experienced instructors help you develop the knowledge and skills you need to install, operate and service commercial and industrial refrigeration and HVAC equipment. Your training includes:

KSDW 20: Basic refrigeration systems, cycles and components

KSDW 21: System installation

KSDW 22: Electrical control systems

KSDW 23: Graphics, math, hand tools

KSDW 24: Mechanical and electrical skills

KSDW 25: Refrigerants and refrigeration load calculation

KSDW 26: Safety

KSDW 27: System design, installation, operation

KSDW 28: Test and repair system components

KSDW 29: Hands-on Training

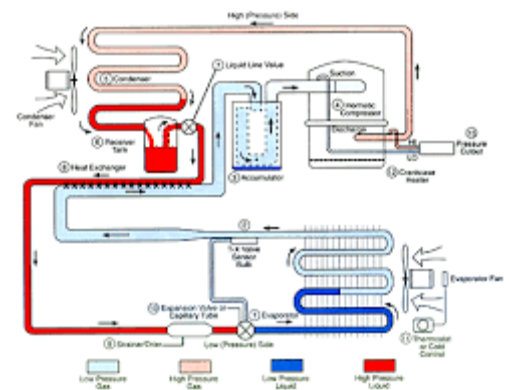

You'll spend as much time getting "hands-on" experience in the shop as you do in the classroom. You'll also participate in a work experience.

The Day-to-Day Job

Having a natural aptitude for mechanical and electrical equipment or systems is an asset; good problem-solving and customer service skills are a must.

FEES: 2,000 (ZMK)

A Head Start on Apprenticeship: Your Certificate will gain you advanced standing as an apprentice in the Refrigeration Mechanic trade, which can significantly improve your earning power and employability.
